

GALVA

Single-wall galvanized steel

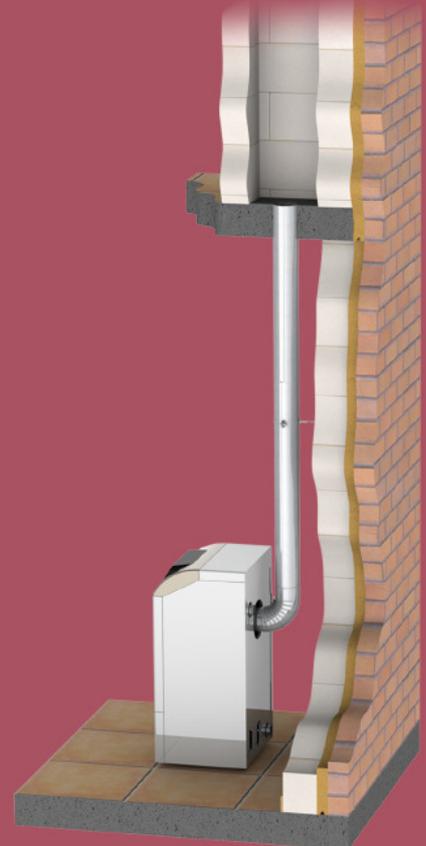

All-purpose pipes

- The GALVA product range consists of stove pipes in galvanized steel and is suitable for connecting the stove to the chimney. The ducts can be applied as long as they remain visible within the room where the combustion appliance is located.

- The product range includes straight elements, elbows, tee-pipes and all necessary accessories such as caps, wall clamps, reductions, anchor plates and rain caps.
- Thanks to the crenelated male/female connector the orientation of the duct can easily be adapted to the needs of your living room.
